- The Sub-Fund is classified in the risk and reward category 2 because the investments' value can be subject to high daily variation, both positive and negative.
- The historical data such as is used to calculate the synthetic risk and reward indicator may not be a reliable indication for the future risk profile of the Sub-Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and the categorization of the Sub-Fund may shift over time.
- Even the lowest risk category does not mean a risk-free investment.

THE SYNTHETIC RISK AND REWARD INDICATOR DOES NOT ADEQUATELY CAPTURE THE FOLLOWING RISKS:

- **Credit risk:** The Sub-Fund invests in securities whose credit rating may get worse, increasing the risk that the issuer is unable to fulfil its commitments with a negative impact on the securities' price.
- **Developing market risk:** The Sub-Fund is exposed to securities highly sensitive to political and economic instability of developing countries such as civil conflicts, changes in government policies and in taxation, restrictions on foreign investment (including capital control), currency repatriation, currency fluctuations and other developments in the laws and regulations of countries in

which investments may be made. Price changes may be higher than those in the markets of developed countries. Investing in the People's Republic of China (PRC) is subject to the risks of investing in emerging markets and additional risks, which are specific to the PRC market. In case of investment in China A shares and/or debt securities issued by Mainland China issuers, where securities are held in custody on a cross-border basis, there are specific legal/beneficial ownership risks linked to compulsory requirements of the local central securities depositories.

- **Coco risk:** investments in CoCos may expose the Sub-Fund to different risks, the main ones being: Unknown risk, Conversion risk, Write down, Trigger event, Coupon Cancellation, Call extension risk, Capital structure inversion risk, Yield/Valuation risk, Industry concentration risk (as described in the Fund's Prospectus).
- **Liquidity risk:** The Sub-Fund invests in markets that can be characterized by a reduced possibility to exchange securities without a negative impact on prices.
- **Regulatory risk:** Risk that regulation changes (in particular in respect of securitizations and contingent convertible bonds) may negatively impact the Sub-Fund in respect of market prices and liquidity.
