# Fonditalia Bond US Plus

Sub-Fund of Fonditalia Fund

Class RH (ISIN LU0937587813) / Class TH (ISIN LU0937587904)

Management Company: Fideuram Asset Management (Ireland) dac, Intesa Sanpaolo banking group

## OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund, expressed in Euro, aims to prudently generate a total return through a combination of both income and capital growth. The Sub-Fund invests in a wide range of fixed income securities (which are loans that pay a fixed or variable rate of interest) issued by companies or governments from around the world. Securities will mainly be priced in US Dollars but the Sub-Fund may also hold other currencies as well as securities that are priced in other currencies. The investment advisor will choose securities with varying repayment dates based on its expectations for interest rate and exchange rate changes. The Sub-Fund may invest in emerging markets, which in investment terms are those economies that are still developing.

The securities will mostly be "investment grade", as determined by international ratings agencies. Whilst potentially producing a lower level of income than "non-investment grade" securities, they are also considered to be of lower risk.

For the attainment of its objective, the Sub-Fund's assets may be invested in mortgage backed securities (MBS), commercial mortgage backed securities (CMBS), asset backed securities (ABS) and

securities equivalent in nature to such securities. Investments in such securities carry the risk of default of the underlying collateral.

The Sub-Fund may invest in contingent convertible bonds ("CoCos") up to 10% of its net assets.

The Sub-Fund is covered against the exchange rate risk by a hedging strategy on currencies.

The benchmark of the Sub-Fund consists of the index "Bloomberg Barclays US Aggregate Index" Total Return, Hedged in EUR.

The Sub-fund is actively managed and the degree of freedom allowed within the management of the sub-fund is significant. The relative risk and positioning to the benchmark is monitored. To provide a disciplined management approach, risk limits are set to contain investment risk. This may impact the extent to which the composition of the portfolio and its performance deviates from that of the benchmark.

RH and TH are capitalization Unit-Classes.

You may request to redeem the units held at any moment, by sending a request on any business day.

## RISK AND REWARD PROFILE

Lower risk

Higher risk

- This Sub-Fund is classified in the risk and reward category 3 because the investments' value can be subject to limited daily fluctuations, both positive and negative.
- The historical data such as is used to calculate the synthetic risk and reward indicator may not be a reliable indication for the future risk profile of the Sub-Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and the categorization of the Sub-Fund may shift over time.
- Even the lowest risk category does not mean a risk-free investment.

### THE SYNTHETIC RISK AND REWARD INDICATOR DOES NOT ADEQUATELY CAPTURE THE FOLLOWING RISKS:

- **Credit risk:** The Sub-Fund invests in securities whose credit rating may get worse, increasing the risk that the issuer is unable to fulfil its commitments with a negative impact on the securities' price.
- **Developing market risk:** The Sub-Fund is exposed to securities highly sensitive to political and economic instability of developing countries such as civil conflicts, changes in government policies and in taxation, currency fluctuations and other developments in the laws and regulations of countries in which investments may be made. Price changes may be higher than those in the markets of developed countries.
- **Coco risk:** investments in CoCos may expose the Sub-Fund to different risks, the main ones being: Unknown risk, Conversion risk, Write down, Trigger event, Coupon Cancellation, Call extension risk, Capital structure inversion risk, Yield/Valuation risk, Industry concentration risk (as described in the SICAV's Prospectus).
- **Liquidity risk:** The Sub-Fund invests in markets that can be characterized by a reduced possibility to exchange securities without a negative impact on prices.
- **Counterparty risk:** The Sub-Fund invests into instruments, such as derivatives, by entering into contracts with financial counterparties, exposing itself to the risk that said intermediaries may generate financial damage to the fund itself by not fulfilling their obligations in the future.
