# Fonditalia Bond High Yield Short Duration

Sub-Fund of Fonditalia Fund

Class R (ISIN LU1005157505) / Class S (ISIN LU1005158651) / Class T (ISIN LU1005158578)

Management Company: Fideuram Asset Management (Ireland) dac, Intesa Sanpaolo banking group

## OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund, expressed in Euro, has an investment objective to maximize a total return through investment primarily in high yield, high risk debt securities, but principally in sub-investment grade securities with a credit quality equal to BB or lower, including issues not-rated deemed to have a similar internal rating as defined by investment manager.

The Sub-Fund may also invest in common and preferred stock from time to time and in units/shares of any UCITS and/or UCIs.

The Sub-Fund will invest globally mainly in high yield fixed income transferable securities with no geographical restriction. Moreover, the Sub-Fund may use financial derivative instruments for the purpose of risk hedging and for investment purposes. In addition, the Sub-Fund may use currency derivatives to hedge investments back to the Euro.

The benchmark of the Sub-Fund consists of the index "ICEBofA ML 1-5 Year US Cash Pay High Yield Constrained Total Return in USD hedged in EUR".

The Sub-fund is actively managed and the degree of freedom allowed within the management of the sub-fund is significant. The relative risk and positioning to the benchmark is monitored. To provide a disciplined management approach, risk limits are set to contain investment risk. This may impact the extent to which the composition of the portfolio and its performance deviates from that of the benchmark. This Sub-Fund has three Unit-Classes: Class R, S and T. R and T are capitalization Unit-Classes. With reference to the Unit-Class S, the net incomes of the Sub-Fund will be distributed in accordance with the Prospectus of the Fund.

You may request to redeem the units held at any moment, by sending a request on any business day.

## RISK AND REWARD PROFILE

Lower risk

- This Sub-Fund is classified in the risk and reward category 4 because the investments' value shows low fluctuations, both positive and negative.
- The historical data such as is used to calculate the synthetic risk and reward indicator may not be a reliable indication for the future risk profile of the Sub-Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and the categorization of the Sub-Fund may shift over time.
- Even the lowest risk category does not mean a risk-free investment.

### THE SYNTHETIC RISK AND REWARD INDICATOR DOES NOT ADEQUATELY CAPTURE THE FOLLOWING RISKS:

- **Credit risk:** The Sub-Fund invests in securities whose credit rating may get worse, increasing the risk that the issuer is unable to fulfil its commitments with a negative impact on the securities' price.
- **Liquidity risk:** The Sub-Fund invests in markets that can be characterized by a reduced possibility to exchange securities without a negative impact on prices.
