- This Sub-Fund is classified in the risk and reward category 4 because the investments' value shows low fluctuations, both positive and negative.
- The historical data such as is used to calculate the synthetic risk and reward indicator may not be a reliable indication for the future risk profile of the Sub-Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and the categorization of the Sub-Fund may shift over time.
- Even the lowest risk category does not mean a risk-free investment.

THE SYNTHETIC RISK AND REWARD INDICATOR DOES NOT ADEQUATELY CAPTURE THE FOLLOWING RISKS:

- **Counterparty risk:** The Master Fund invests into instruments, such as derivatives, by entering into contracts with financial counterparties, exposing itself to the risk that said intermediaries may generate financial damage to the Master Fund itself and indirectly to the Feeder Fund by not fulfilling their obligations in the future.
- **Operational Risk:** Investment in the Master Fund may be affected by operational risks which may exist within the

investment manager, the administrator and other service providers to the Master Fund. Failures or delays in operational process of either of the Sub-Fund or the Master Fund may negatively affect the Feeder Fund.

- **Liquidity Risk:** The Net Asset Value of the Feeder Fund will rely essentially on the net asset value of the Master Fund. As a consequence, the Net Asset Value per share will be determined only after the computation and publication of the net asset value of the Master UCITS. The purchase and redemption of the shares of both for the Master Fund and Feeder Fund shall be processed every business day as defined in the Fund's Prospectus. There is a risk that the Master Fund has no exposure to the Strategy for certain periods. In this case, Shareholders will be exposed to overnight interest rates which might be negative.
- **Derivative Risk:** The Master Fund does not offer full capital protection. Additionally, if the Approved Counterparty became insolvent, the capital protection obtained through the FDI might fail.
