## OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund, expressed in Euro, seeks to achieve an attractive level of income along with the opportunity for capital growth. The exposure to the above-mentioned asset classes may be achieved through direct investments and/or through indirect investments in units of collective investment schemes (the exposure to indirect investments is up to 20% of its net asset value).

- This Sub-Fund is classified in the risk and reward category 3 because the investments' value can be subject to limited daily fluctuations, both positive and negative.
- The historical data such as is used to calculate the synthetic risk and reward indicator may not be a reliable indication for the future risk profile of the Sub-Fund.
- The risk and reward category shown is not guaranteed to remain unchanged and the categorization of the Sub-Fund may shift over time.
- Even the lowest risk category does not mean a risk-free investment.

### THE SYNTHETIC RISK AND REWARD INDICATOR DOES NOT ADEQUATELY CAPTURE THE FOLLOWING RISKS:

- **Credit risk:** The Sub-Fund invests in securities whose credit rating may get worse, increasing the risk that the issuer is unable to fulfil its commitments with a negative impact on the securities' price.
- **Developing market risk:** The Sub-Fund is exposed to securities highly sensitive to political and economic instability of developing countries such as civil conflicts, changes in government policies and in taxation, currency fluctuations and other developments in

the laws and regulations of countries in which investments may be made. Price changes may be higher than those in the markets of developed countries.

- **Coco risk:** investments in CoCos may expose the Sub-Fund to different risks, the main ones being: Unknown risk, Conversion risk, Write down, Trigger event, Coupon Cancellation, Call extension risk, Capital structure inversion risk, Yield/Valuation risk, Industry concentration risk (as described in the SICAV's Prospectus).
- **Liquidity risk:** The Sub-Fund invests in markets that can be characterized by a reduced possibility to exchange securities without a negative impact on prices.
- **Counterparty risk:** The Sub-Fund invests into instruments, such as derivatives, by entering into contracts with financial counterparties, exposing itself to the risk that said intermediaries may generate financial damage to the fund itself by not fulfilling their obligations in the future.
- **Regulatory risk:** Risk that regulation changes (in particular in respect of securitizations and contingent convertible bonds) may negatively impact the Sub-Fund in respect of market prices and liquidity.
